PH6 waves (post hoc): discovery D = -5.7 pp (one-sided p 0.000); held-out D = -5.2 pp (one-sided p 0.043)
(a) Per wave (* = inspected before declaration)
(b) Pooled over waves (descriptive)
discovery
held-out
differential privacy
explainability
representation learning
adversarial robustness *
semi-supervised learning
offline reinforcement learning
federated learning *
multi-agent reinforcement learning
fairness
self-supervised learning *
adversarial attack *
optimal transport
contrastive learning *
robustness
data augmentation
graph neural networks *
vision transformer
