Topics hot in >= 3 of 8 years (k100), by first hot year; blank = no papers
hot (top 20% prior growth)
m002 LLM safety, jailbreaks and security
m009 LLM watermarking, AI-text and hallucination d...
m010 LLM reasoning and chain-of-thought
m039 Domain adaptation and generalization
m033 Conformal prediction and tree-based tabular l...
m029 Federated learning
m023 Medical image analysis
m022 CNN and vision transformer architectures
m042 Knowledge and dataset distillation
m035 Algorithmic fairness and bias mitigation
m069 Molecular and materials property prediction
m090 Text-to-image diffusion control and editing
m082 VLM benchmarks and multimodal reasoning
m088 Video and human motion generation
m051 LLM pre-training, MoE and LoRA
m013 RL with verifiable rewards for LLMs
m099 EEG, fMRI and biosignal decoding
m077 Autonomous driving planning and prediction
m068 Protein and genomic modeling
m063 Video-language understanding
m021 Neural rendering and geometry estimation
m061 Multimodal LLMs for image understanding
m004 In-context learning, fine-tuning and unlearni...
m003 LLM evaluation, judges and uncertainty
m079 Diffusion model formulation and sampling
m055 Efficient LLM inference and serving
m011 LLM agents and agent benchmarks
m016 Preference alignment and RLHF
